

ASBESTOS INSPECTION

Assessment to determine the presence and condition of asbestos in non-residential properties is a requirement of Regulation 4 of The Control of Asbestos Regulations 2006, effective from 13 November 2006.

Our service involves a qualified surveyor inspecting the premises and reviewing relevant documentation to establish the likelihood of the presence of asbestos. The inspection is recorded and a risk assessment is provided to the client. Where asbestos is identified, suspected or assumed, we will also provide guidance on ongoing management.

Asbestos Inspection Services

- ▶ Review of building operating manuals/plans and drawings
- ▶ Inspection of the premises
- ▶ Formal record of the survey to comply with the requirements of the legislation
- ▶ Client report incorporating risk assessment
- ▶ Guidance on formulating an appropriate management action plan
